## AN EXPERIENCE BEYOND THE LICENCE

An interactive and engaging course using a vehicle, simulation, dash cam footage, and user friendly information

**Every day in Melbourne** we are dealing with a variety of collisions; some that are causing the city to come to a standstill. The Government's focus is currently on post-crash care, protecting vulnerable road users, improving infrastructure and enforcing good behaviour.

**At CRUDE Ultimate Driving Education** we believe in a proactive, preventative and holistic approach. We educate drivers to increase their knowledge and awareness of operating a vehicle to assist in reducing collisions, injuries and fatalities on our roads.

**The Advanced Driver course** consists of 5 modules built from the ground up to provide an engaging and interactive experience to all participants.

**MODULES** 

## 1. FORGOTTEN LAW

An explanation of various laws that are often forgotten; providing updates, and showcasing the fines and demerit points for such laws along with on-road dash cam footage from driving lessons to provide a visual aid

## 2. AWARENESS

A demonstration and discussion on instruments, observation, distractions, visibility, patience, communication, etiquette, fatigue and road rage

## 3. BASIC MAINTENANCE

A demonstration and participation in the basics of maintaining a vehicle from checking fluids like oil, to checking tyre treads and tyre pressures

## 4. TYRE CHANGING

A demonstration with the option to participate, in the changing of a tyre

## 5. VEHICLE DYNAMICS

A demonstration and discussion on the dangers of various physics and dynamics a vehicle can output that can cause harm if not avoided. Using a simulator, participants can then witness these dangerous effects through the feedback - visual and sensory - from a simulation steering wheel in a safe environment

**BOOK NOW** 

To find out more information on costs  
and availability for the Advanced  
Driver course, please make contact  
via email at [info@crudedriving.com.au](mailto:info@crudedriving.com.au)  
or via phone on 0430084689

Together we can reduce collisions,  
injuries and fatalities on our roads,  
and it starts with you!
